

# Provost Road Closure Notification

2022

In advance of a significant Pennsylvania Department of Transportation (PennDOT) bridge replacement project on Weyman Road, Columbia Gas will undertake and complete a pipeline relocation project transferring pipe from Weyman Road to Provost Road.

In order to complete the project in a timely and safe manner, Columbia Gas and its contractor, will institute a two months long road closure and detour on Provost Road between Saw Mill Run Blvd and Greenlee Road. This temporary road closure is approved by PennDOT and Allegheny County.

The detour, road closure and pipeline relocation work is expected to start the week of July 11, 2022, lasting approximately two months with a goal of concluding by late August 2022. These estimates are based on weather and road conditions while working the relocation project.

There will be a posted detour for traffic utilizing Saw Mill Run Blvd and Greenlee Road (see map). This closure will allow for safe travel by motorists around the work zone and enhance safety and efficiency for work crews to complete work on Provost Road.

Please use extreme caution when traveling near the Columbia Gas work zone. Please slow down and obey all posted detour signs or flaggers. Questions related to the Columbia Gas Weyman Road pipeline relocation project should be directed to Ron Thompson, Project Manager, at 724-986-8936.

Columbia Gas apologizes for any inconvenience. We appreciate your patience and cooperation on this important project to maintain safe and reliable natural gas service to homes and businesses in the community.
